# Radon Test Report

March 18, 2021  
Batch #: 031821-1

**Customer:**

John Doe  
123 Main Street  
Oak Ridge TN 37748

**Test Site:**

John Doe  
123 Main Street  
Oak Ridge TN 37748

E-PERM® Electret Ion Chambers were used for radon screening measurements that were conducted at the above referenced test site by:

**The Results are as follows:**

Serial No.	Type	Location	Test Start Date	Test End Date	Results (pCi/L)
SAA001	SST	Basement	05-Mar-2021 10:31 AM	07-Mar-2021 12:05 PM	6.6
SAA002	SST	Basement	05-Mar-2021 10:31 AM	07-Mar-2021 12:05 PM	6.8

**Average Radon Concentration in: Basement**

**6.7 pCi/L**

**Deployed By:** Lee Ruble #111871-RT  
**Retrieved By:** Lee Ruble #111871-RT  
**Analyzed By:** Lee Ruble #111871-RT **Reader S/N:** E1316 **Reader Calibration Due:** 16-Feb-2022

**Conditions:** Requirements for Closed-Building Met  
**Tampering:** None Observed  
**Weather:** No Abnormal Weather Conditions  
**Vents:** Not Applicable / Fan Not Applicable  
**Mitigation:** No System Installed

## Radon Health Risk Information

Radon is the second leading cause of lung cancer after smoking. The U.S. Environmental Protection Agency (EPA) and the Surgeon General strongly recommend that further action be taken when a home's radon test results are 4.0 pCi/L or greater. The national average indoor radon level is about 1.3 pCi/L. The higher the home's radon level, the greater the health risk to you and your family. Reducing your radon levels can be done easily, effectively and fairly inexpensively. Even homes with very high radon levels can be reduced below 4.0 pCi/L. Please refer to the EPA website at [www.epa.gov/radon](http://www.epa.gov/radon) for further information to assist you in evaluating your test results or deciding if further action is needed.
